Changes in the Tables

Unemployment

Finland.

Beginning with the present issue of the Supplement, the unemployment series has been revised to exclude persons employed on relief work, formerly included. The revised series therefore relates only to the number of persons entered in municipal unemployment registers and actually out of work.

* * *

SYMBOLS AND TYPES EMPLOYED

. = inapplicable or figures not available.
— = nil or negligible.
... = not yet received.
* = provisional.
r = revised since previous issue.

A line——placed between two figures in a column indicates that the figures above and below it are not strictly comparable or that a new series begins below the line (see footnotes).

Figures in *italics* : index numbers based on another year than 1953.

The countries are arranged by continents in alphabetical order.

Guide for Labour Inspectors

Studies and Reports, New Series, No. 41

This guide, based largely on the provisions of the Labour Inspection Convention adopted by the International Labour Conference in 1947, gives in broad outline the essential principles of inspection and indicates methods and procedures of enforcement, advice and inquiry.

The protective labour laws assumed in this guide to be enforceable by inspectors are those dealing with hours of work and related questions (e.g. meal and rest breaks, overtime and night work), wages, the prohibition of child labour, the various regulated aspects of the conditions under which women and young workers are employed, and industrial safety, health and welfare—in short, the laws and regulations concerning conditions of work and the protection of workers while they are engaged in their work.

Although the protection of the safety and health of workers requires the technical skill of competent specialists, these duties are sometimes assigned to general labour inspectors. For this reason the guide includes a section dealing mainly with general problems of industrial safety and health; and, to assist inspectors who may wish to obtain more specific guidance on the most common safety and health risks, a selected bibliography of publications dealing with such problems is appended.

The study is divided into two parts. The first part deals briefly with standards for organising a system of labour inspection; its purpose is to promote a fuller understanding of the principles underlying the organisation, staffing and procedure of the service. Part II deals more particularly with the techniques and procedures to be applied by inspectors in their work of supervising compliance with protective labour legislation.
